

Primary Cell RPKM

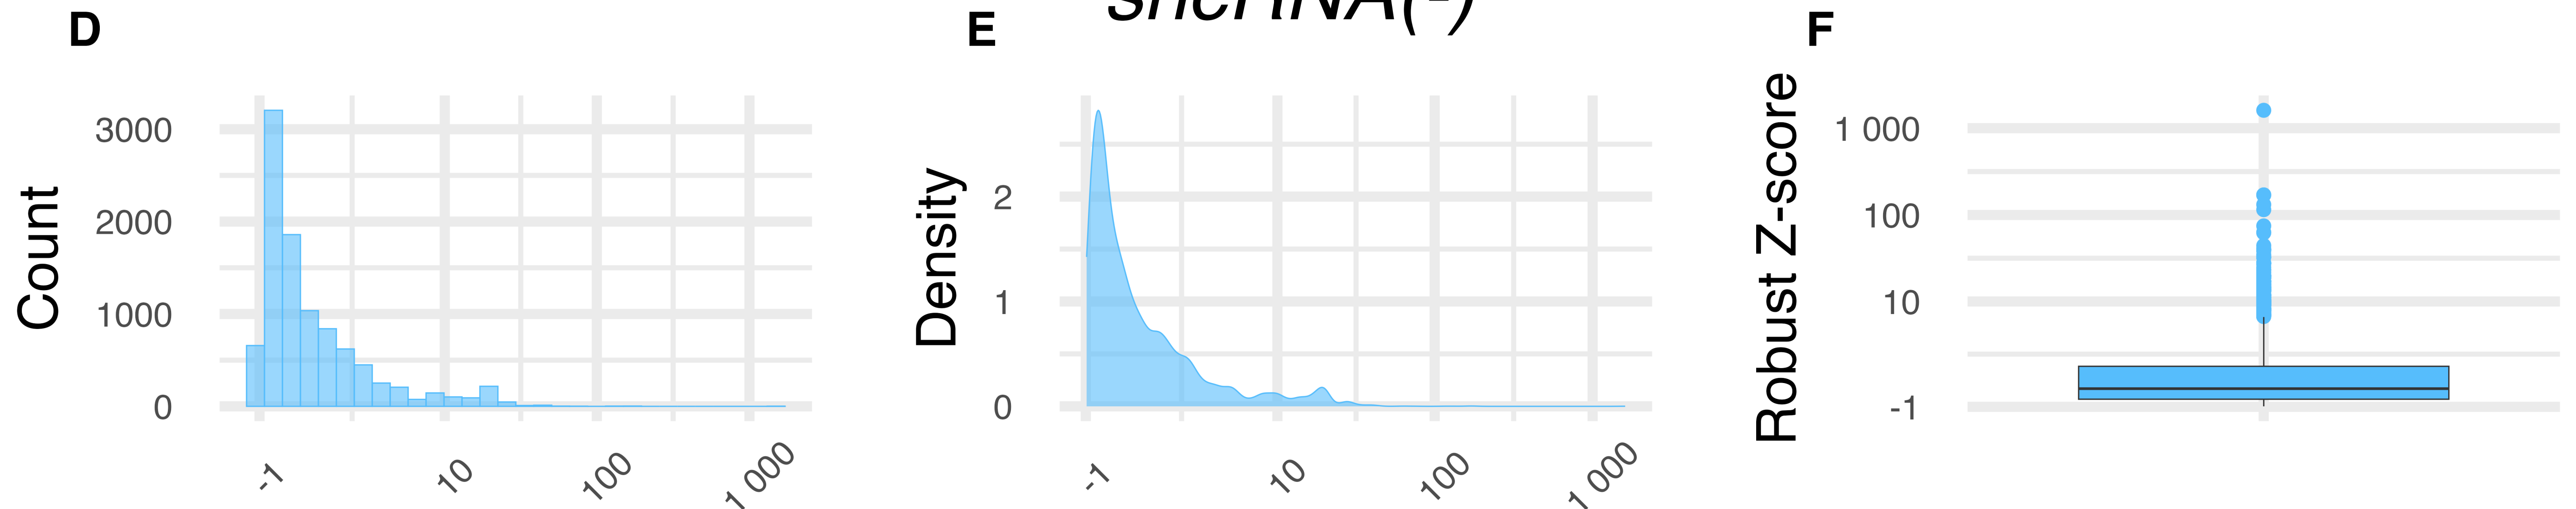

sncRNA(+)

Robust Z-score

Robust Z-score

sncRNA(-)

Robust Z-score

Robust Z-score

Supplementary Figure S5. sncRNA primary cell RPKM robust z-scores distributions in log scale. A-C) Histogram, Density and Boxplot for sncRNA(+), D-F) Histogram, Density and Boxplot for sncRNA(-). The positive dataset show log (robust z-scores) centered around 2, whereas log (robust z-scores) for the negative set are centered around 0.5, this indicates the two dataset come from different distributions
